Architectural Specification Reference

Architectural Collection

Manufactured By:

Atlantic Premium Shutters, Latta, South Carolina (O/E)

Nominal Thickness:

1¼" stiles and side rails on Louvered Colonials and Bahamas.

1" on Raised Panels styles.

(other styles subject to special inquiry)

Installation: To be installed in either a fixed or operable condition in accordance with manufacturers recommendations, with no nailing or screwing through face of shutter.

Material: High density structural PVC and/or pultruded fiberglass and/or proprietary composite material. All slats and louvered side rails to be fiberglass.

Finish: Two part acrylic urethane cured by means of microwave thermology and direct infrared heat – 40 standard colors (custom colors available).

Hardware:

Colonial style shutters - Black powder-coated stainless steel – all other brads and fasteners also to be stainless steel.

Bahama - Aluminum with factory applied two part acrylic urethane finish.

Performance: All fiberglass louvers and side rails to be thermally stable from –100°F to +200°F.

Warranties:

1. Lifetime on structural components and against manufacturer defect limited to original purchaser.
2. Fifteen year warranty on factory applied finish.

Manufactured By:

Atlantic Premium Shutters, Latta, South Carolina (O/E)

Nominal Thickness: Shutters are 1 inch thick (25 mm).

Installation: To be installed in either a fixed or operable condition in accordance with manufacturers recommendations, with no nailing or screwing through face of shutter.

Material: Solid core composite materials.

Finish: Two part urethane paint, oven cured. Hardware: Black powder-coated stainless steel – all other brads and fasteners also to be stainless steel.

Warranties: Provide with a ten year warranty against defects in materials and factory paint finish.

General Notes

To deflect rain away from the structure, louvered shutters should be installed so the louvers face AWAY from the structure when shutters are closed.

Shutter swing is 3" per shutter from the edge of the shutter to the edge of the window opening; be sure to check for proper clearance (i.e. lamps, fixtures) when the shutter is in the open position.

Hinges are usually applied to the back of the shutter. They are only visible in their entirety when the shutter is in the closed position.

Shutters in closed position

Ensure proper clearance of shutters.
