

POLANE®

Solar Reflective Polyurethane Enamel

DARKER COLORS FOR A BRIGHTER FUTURE

Supply the demand

Builders and consumers alike have touted the praises of vinyl for its strength, durability and ease of cleaning. But its tendency to warp and bow with darker hues has dramatically diminished color selection. Until now. Sherwin-Williams'

Polane Solar Reflective

Polyurethane Enamel lets you

meet homeowners', builders'

and architects' demands for color

variety while reducing any worries

about warping due to solar heat.

So as the temperature rises, your

profits will, too.

FPO

POLANE®

Solar Reflective Polyurethane Enamel

COLOR THAT CAN STAND THE HEAT

Breakthrough Technology

Polane has been the most recognized and trusted name in two-component urethane technology for 30 years. And Polane Solar Reflective Polyurethane Enamel will only strengthen that reputation. Its revolutionary reflective characteristics enable vinyl shutters, windows, patio doors and siding to be coated with the dark colors builders, architects and homeowners crave.

Performance Properties

Polane Solar Reflective Polyurethane Enamel utilizes the latest technologies to provide a durable, heat-repelling coating for vinyl applications in dark colors previously impossible to obtain.

- Excellent color and gloss retention
- Resistance to warping or bowing when exposed to solar heat
- Mar, abrasion and chemical resistant
- HAPS free
- Low VOCs
- Passes AAMA 613

Design Engineering

Sherwin-Williams offers design engineering services that work directly with you. By understanding your line manufacturing process, we can provide the right coatings solutions for your needs.

Distribution Network

With a network of over 90 distribution centers, your most-needed products are sure to be in stock at a local facility for fast, reliable delivery. And our local field sales and technical support representatives stand ready to get you the answers you need when you need them.
