### *Green Building Rating System for NC & Major Renovations (LEED-NC) Version 2.1 POTENTIAL LEED™ POINTS – Foundry Shakes and Shapes*

*The TAPCO Group supports the use of sustainable construction practices and energy efficient design in all new and remedial construction projects. The Foundry by formulation and design, manufacturers its products to support this effort and contribute toward achieving LEED points according the LEED Green Building Rating System developed by USGBC. A summary of potential LEED points which may be obtained through the use of Foundry Shakes and Shapes is as follows:*

<i>I. Materials and Resources</i>	<u><i>Potential Points</i></u>
-----------------------------------	--------------------------------

*Credit 2.1-2.2*

- |  |            |
|--|------------|
| <i>A. Construction Waste Management – Divert 50%-75% from Landfill</i> | <i>1-2</i> |
| <i>1. Foundry Shakes and Shapes are 100% recyclable</i>                |            |

*Credit 3.1-3.2*

- |   |            |
|---|------------|
| <i>B. Resource Reuse 5%-10%</i>                           |            |
| <i>1. If product is removed carefully – can be reused</i> | <i>1-2</i> |

*Credit 5.1-5.2*

- |   |            |
|---|------------|
| <i>D. Local/Regional Materials – 20% manufactured locally</i>         | <i>1-2</i> |
| <i>1. Foundry Shakes and Shapes are manufactured n Southern, Ohio</i> |            |
| <i>2. Defined as any project within 500 miles of plant site</i>       |            |

***Total Potential Credit.....3-6***
